Sub: Industries- Sericulture- Cold storage Plant- Installed central silk farm- Kollegal- Single phasing preventor purchase of- Sanction- Requesting.

Ref:-G.O.No.Ms. 1530 dated 8/4/47.

On account of some electrical trouble in the cold storage plant installed at the Central silk Farm, Kollegal, the 1½ H.P.3 phase electric motor which was originally supplied by Messrs. Richardson & Cruddas, Madras with the cold storage plant was burnt out. The 2 H.P. 220 volts, 25 cycles 3 phase motor purchased as spare, as per sanction accorded in G.O.No.Ms.1530 Development dated 8/4/47, was fitted in place of the burnt one. The burnt motor has subsequently been repaired. Messrs.Richardson and Cruddas who fitted the new motor stated that the burning out of the original motor was caused by one of the high tension fuses on the main line having burnt out. To avoid similar troubles on the mains and to have a safety device for the cold storage plant they suggested the installation of a single phase preventor on the switch board between the mains and the electric motor. A single phase preventor was accordingly arranged to be fixed to the plant by the Sericultural Expert through Messrs.Richardson & Cruddas at a cost of Rs.165/-. I request that Government may be pleased to accord sanction for the purchase of the Single Phase preventor at a cost of Rs.165/-.

Draft order sent for issue on 28/1/48
